

Soccerboard

Professional Led Display Scoreboard Software

QUICK MANUAL

www.footballscoreboardsoftware.com

arslan.ziya@gmail.com

LANGUAGE SUPPORT

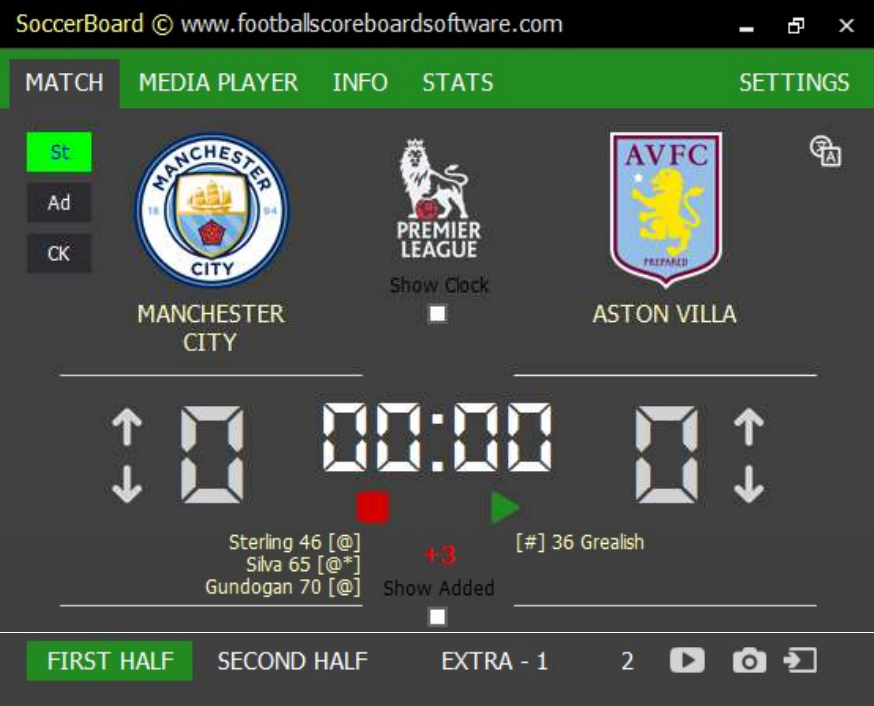

Soccerboard supports all languages, you can use all world special alphabets such as Arabic, Chinese, Hebrew, Asian languages in the application.

You can translate menus to your language

MAIN SCREEN MATCH St

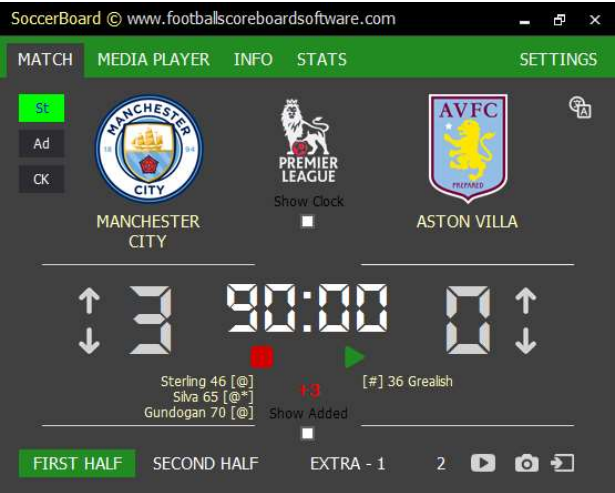

Led Display Output

If you are working with a large resolution and you are using the dual monitor of your pc.

You can adjust the layout of the scoreboard and switch between the two screens quickly

For to make necessary settings
SETTINGS>DISPLAY PROPERTIES>Top,Left...

Control Panel

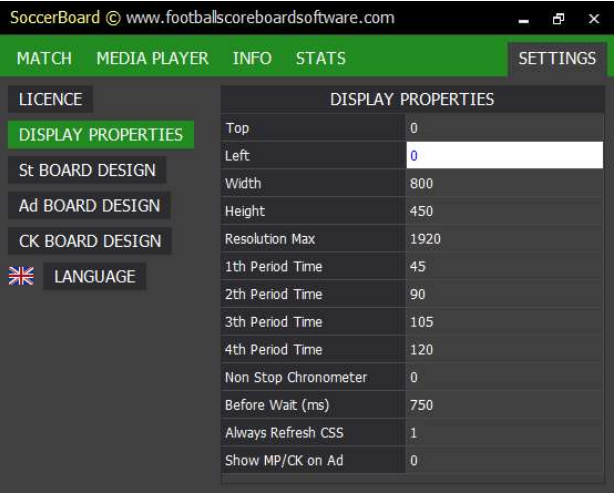

Quick switch between scoreboard and Media Player/Information screens

Select logo by left clicking the images, Right click to SHOW\HIDE logo on scoreboard, You can edit team names, You can select output types
ST - Standard
Ad - Advertising
CK - ChromaKey

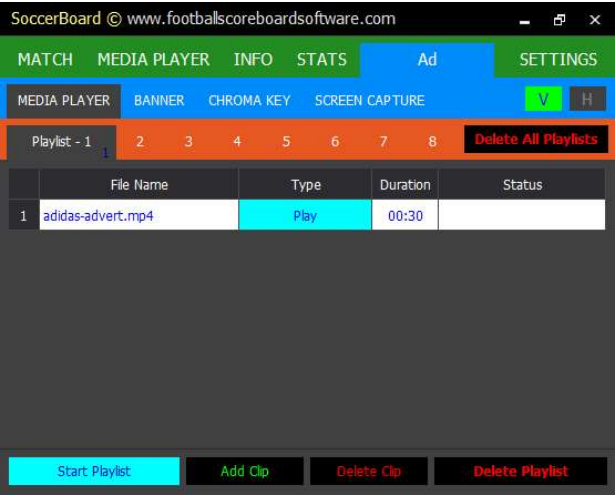

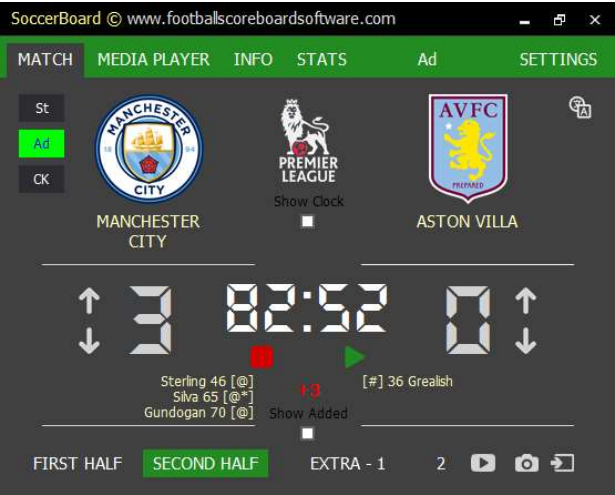

You can manage the team score and chronometer. To edit time, you must stop the chronometer

You can edit for goals

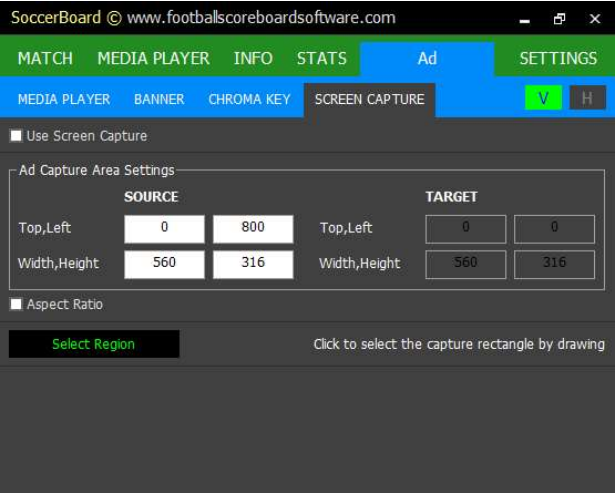

The scoreboard time is set according to the selected period. You must stop the chronometer to make a selection
You can set background video, background image, and send changes to player names to output

MAIN SCREEN MATCH Ad

Ad screen can play continuously the playlist prepared before.
Click 'Add Clip' button to select media and click 'Play' button for led display Show

See a video playing on your computer on the led screen, you can select any frame area on the screen and view it on the Ad scoreboard.

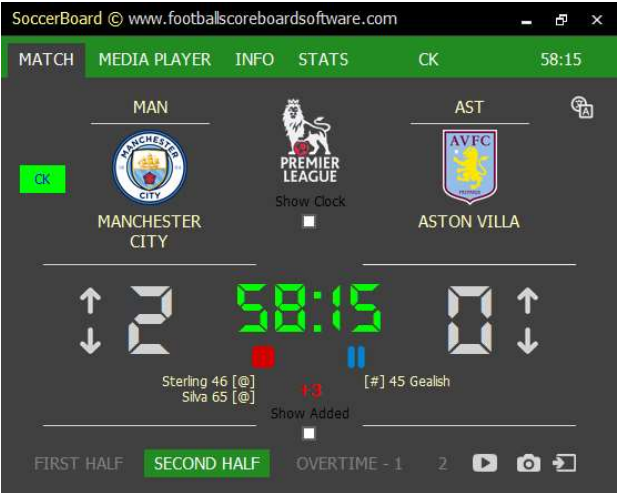

You can edit the segments and layouts on the Ad Screen from the **SETTIGS>Ad Scoreboard Design>SEGMENTS**.

MAIN SCREEN MATCH CK

Led Display Output

Control Panel

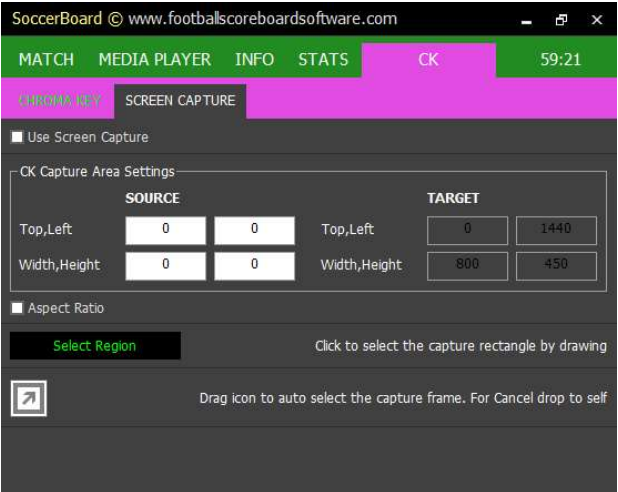

CK Screen is used to overlay graphics and text on a broadcast video when used with related software (OBS, Vmix etc).

Maybe if you have a live broadcast system or devices

- You can set chroma key for videomixer devices
- You can select any frame region on the screen and display it on the CK scoreboard

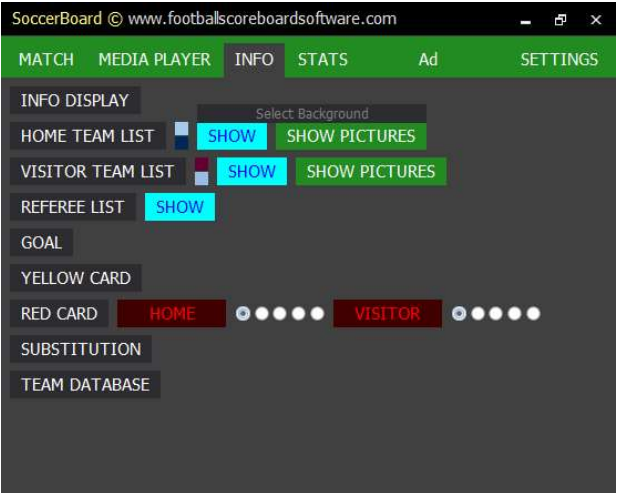

Soccerboard software cannot read capture cards (canopus, black magic, aja, sony), but can receive images via their original players. Or OBS player etc

MAIN SCREEN INFO

You can easily send ready animations for events such as Team Lists, Cards, Goals, Substitution etc, to the led screen without creating special graphics or animations.

All you have to do is select the event type, player name, etc.

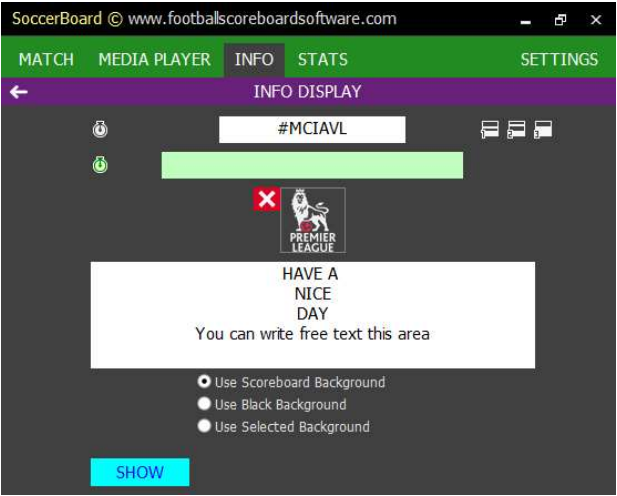

Control Panel

INFO DISPLAY

Led Display Output

You can write informative texts for match information, number of fans, warnings and information.

Control Panel

HOME TEAM LIST

You can enter player names manually.
